FOREWARD

This report provides data on total scheduled air carrier operations by hour of the day for Friday, August 5, 1977, for the top 100 airports within the 50 states, the District of Columbia, and Puerto Rico. The selection of the top 100 airports was based on the rank order of the number of air carrier passenger enplanements in domestic and international service in 1973.

Source of the schedule data was the August 1, 1977 edition of the Official Airline Guide, produced by the Reuben H. Donnelly Corporation. Tabular listings and graphics presented in this report were produced by the Department of Transportation, Transportation Systems Center, Cambridge, Massachusetts. Two graphs are provided for each airport which visually depict (1) total number of arrivals and departures by hour, and (2) total aircraft operations by hour, detailed by the following types of service:

a. Domestic Trunk Pax,
b. Local Service Pax,
c. Air Taxi Pax,
d. International Pax (U.S. & Foreign Flag), and
e. All-Cargo Operations

These profiles provide a clear visual presentation of aircraft operations at major airports for use by technical and nontechnical personnel in analyzing changes in workload throughout the day, for comparing and noting different hourly traffic patterns among these airports, and for establishing a base for readily identifying changes in traffic patterns over time. An analytical graphic format allows rapid exposure to complex operations profiles yet ensures a high rate of comprehension in limited time frames.
